

### Great performance in its class

The new Turfcom V-300 removes grass clippings, leaves and debris efficiently and economically. Suitable for turf farms, golf courses, public sports fields and parks.

The grass clippings collector offers a 3 meter working width, a large 10 m<sup>3</sup> hopper and operates at speeds of up to 15 km/h. The V-300 is highly efficient, using the maximum width of a 3 meter suction unit without folding arms.

A very high level of reliability is achieved by a purely mechanical solution without any electronics. Moving parts are kept to a minimum. This leads to very low maintenance costs

### Simple operation and minimal ground pressure

The machine attaches easily to the tractor's drawbar and only requires one hydraulic power connection and return hose .

The high suction-power in combination with the active hydraulically driven grooming brushes driven by two hydraulic motors give a top-class result. The suction-head has a working-width of 3meters.

The large hopper with 10 m<sup>3</sup> capacity is quick to tip and empty. It has an automatic opening and closing rear door. Four wide tyres suspended on pendulums provide a very even weight distribution of the machine to the surface. Effective workrates of up to 3,5 ha can be achieved.

## Turf Sweeper and Vacuum V-300

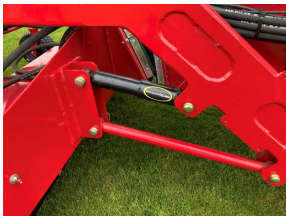

The ideal solution for turf farms

Minimum compaction: 4 turf tires on pendular axles

Low noise turbine with VA2 lining against abrasive wear

Perfectly following contours due to floating suction head

Quick unload automatic rear door. Just tip and go!

### Specifications

Pulled agricultural implement 25 km/h (Germany)  
 Effektive working width : 2.9 m  
 Transport width: 3.0 m  
 Attachment: drawbar  
 Operating speed: 2 km/h to 15 km/h  
 Transport speed max. 25 km/h  
 Productivity: up to 9 acres/h  
 Length: 5.9 m  
 Width: 2.99 m  
 Height: 2,40 m  
 Empty weight: 2358 kg  
 Payload: 640 kg; 10 m<sup>3</sup> Capacity  
 Maximum Weight : 2999 kg  
 Breaks: None  
 PTO speed: 540 RPM  
 Minimum PTO Power: 38 KW/h ( 50 HP)  
 Hydraulic requirement: 1 pressure (perm. flow),  
 1 return  
 Certification by manufacturer (CN): CE  
 (Specifications can be subject to change without prior notice)

### What customers say:

"The Turfcom V-300 is the perfect machine for our business. It has had no downtime and its so well designed, my operators love using it".

"Finally a machine that simply does what it's supposed to do, without unnecessary electronics, without too many moving parts like gear boxes and unnecessary sprockets and chains"

"One 50 HP tractor is sufficient to pull it and we manage to cover up to 10 acres/hour. I am really saving a lot of fuel using the Turfcom V-300"

### Main Advantages

Best working width and quietest suction blower in its class, high operating speeds of up to 15 km/h.

4 turf tyres on pendular axles for optimal weight distribution.

Highly efficient, quiet turbine.  
 Brushes with twin hydraulic drive.

Simple height adjustment of the suction-head.  
 Quick to unload equals more productive time.  
 Only requires 50 HP PTO-Power.
